

Athletic and Stadium Safety Solutions

A professional-grade weather station that tracks 27 different parameters and in-cloud and cloud-to-ground lightning in real-time—providing advanced warning to help keep players, coaches and visitors safe.

The Most Advanced Lightning Detection

WeatherBug sets the standard for lightning and severe weather detection and alerting. Using the most advanced cloud-to-ground and in-cloud lightning detection and alerting system available, it can provide the time needed to relocate athletes, staff and spectators indoors faster. Any other detection and notification system is outdated.

Schools and Organizations Nationwide Are Keeping Athletes and Staff Safe by Using WeatherBug to:

- Receive early warning of lightning and severe weather
- Help support outdoor and athletic decisions and get people to safety;
- Establish lightning policies for schools and districts
- Access real-time information about their facility from any location including the office, field or team bus and at home
- Send specific alerts from their facility's exact location to coaching staff and other recipients
- Rely on the ALL-CLEAR sound that informs coaches and officials when it is safe to go outdoors and resume activities
- Save time by removing the need to go from field to field to give warning
- Confirm lightning detection with advanced visual tools that show what is happening in real time

Advanced Warning Helps Save Lives

WeatherBug equips coaches and school officials with a turnkey solution that constantly monitors dangerous weather conditions and issues customized alerts in real time. WeatherBug provides on-site detection and advanced alerts for lightning and severe weather to multiple locations via multiple methods—**mobile devices, computers, indoor visualization** or to an **outdoor alerting system**.

The WeatherBug Outdoor Alerting System allows coaches to stay focused and takes the guesswork out of making the call to postpone or cancel outdoor activities when lightning is near. The 110-decibel outdoor alerting unit is automated—even if you're not outdoors, the system will alert those who are outdoors when lightning comes within a preset distance from your facility. Now your school can have a solid policy to help protect players, students, staff and visitors.

Cameras Provide High-Definition Access to Your Facility

In addition to providing stunning images, WeatherBug HD Cameras integrate seamlessly into the 21" WeatherBug Display and work with the host of WeatherBug applications on **mobile phones, tablets** and **computers** – providing high-definition access to your facility's live weather conditions. Now you can keep an eye on your facility whenever you want and wherever you are.
